### Summary

---

Full Stack Software Engineer experienced in building and deploying production-ready web applications using modern JavaScript technologies such as React, Next.js, Node.js, NestJS and databases. Strong background in developing scalable frontends, backend APIs, and AI-powered features. Comfortable working across the full development lifecycle and adaptable to full-stack, frontend, or backend roles.

### Professional Experience

---

**Associate Software Engineer**, Kodeark Jul 2025 – Present

- Developed and maintained production-grade full stack applications across frontend and backend layers.
- Built scalable APIs and backend services using Next.js, NestJS, and Express.js.
- Designed and implemented database-driven features using PostgreSQL, MongoDB, and Supabase.
- Converted Figma designs into responsive, production-ready UI using React, Next.js, and shadcn/ui.
- Collaborated with cross-functional teams to deliver high-quality frontend components and user experiences.
- Integrated third-party services including AI APIs and payment gateway solutions.
- Implemented full stack features such as order tracking systems and business workflow automation.
- Contributed to development of AI-powered platform features, working across both frontend and backend.

**Front-end Developer Intern**, EntraCloud Jun 2024 – Aug 2024

- Built responsive UI components using React, HTML, CSS, and JavaScript.
- Improved UI consistency and cross-browser compatibility.
- Collaborated with backend developers to integrate APIs for a full-stack e-commerce prototype.

### Projects

---

**Forless ai**, Ai powered Website Builder [↗](#)

- Developed an AI-powered website builder allowing businesses to generate websites using prompts.
- Built complete frontend, backend APIs, admin panel, and user dashboard.
- Integrated AI services and payment processing for production deployment.

**Signal-life-coaching**, Coaching and learning management system [↗](#)

- Built responsive dashboard interfaces using Next.js, TypeScript, TailwindCSS, shadcn/ui.
- Developed reusable UI components (forms, tables, dialogs, cards) following scalable architecture patterns.
- Implemented role-based interfaces for Admin, Coach, and User workflows.
- Designed frontend architecture ready for backend integration using validations, and modular folder structure.

**Kaezu**, Multi-Vendor Marketplace [↗](#)

- Contributed to a UK-based multi-vendor platform where vendors can list products and services for events.
- Implemented order tracking with structured status lifecycle controlled by vendors and visible to customers.
- Built REST APIs and frontend features using Next.js and Express.js for vendor workflows and statistics.
- Improved UI consistency and platform reliability through enhancements and bug fixes.

### Skills

---

**Languages:** JavaScript, TypeScript

**Backend:** Node.js, NestJS, Express

**Tools:** Git, GitHub, Postman, Prisma

**Frontend:** React, Next.js, TailwindCSS, shadcn/ui

**Databases:** MongoDB, PostgreSQL, Supabase

### Education

---

**Govt. College University, Lahore** — BS Computer Science

Sep 2021 – Aug 2025

**Peak Solutions College, Lahore** — Web Development Certificate

Jul 2021 – Oct 2021
